

AQUEDUCTS.

enquiries among those who had experience in this pleasure in calling on him at his office repeatedly, business, and read all that met our eye upon the to speak of my success, and to thank him for his subject. Among the information thus obtained, most valuable suggestion. I have lived to bewe think that furnished a week or two ago by come convinced that Mr. Dexter's opinion, that Mr. Charles Stearns, of Springfield, Mass., to the timber thus laid will out-last iron, may be safely New England Farmer, particularly valuable; regarded. It will occur to any person of practiand as we know that some of our readers are cal experience, that a post set say three feet deep, placed as we were, in need of advice and infor- will rot off near the surface, while the lower part mation on this matter, we make the following is comparatively sound. Mr. Dexter has samextracts from Mr. Stearns' remarks. We omit ples of my aqueduct which have laid from eight only those particulars that relate to the opposi- to thirteen or fourteen years, and I doubt not he tion, struggles, and success in Springfield; that will show them to whoever may feel interested to being a local incident rather than pertaining to see them, and I will send you samples taken off the general principle of laying water pipes.

MR. EDITOR :- I cheerfully answer the inquiry of Mr. Constantine, in your paper of the 15th I followed the injunctions of Mr. Dexter strict-

barns. This was the first drawn lead aqueduct but a sheet lead pipe soldered together, was conbut it was of short duration. Our aqueduct lasted some fifteen years, when it failed by corrosion, and was replaced by new pipe. The last pipe is, so far as I know, still in use, and I at-

caution to cover it, say a foot deep, with clay. three or four years, that this new lead aqueduct beyond dispute. began to need repairs, and after being at connearly every rod of my pipe more or less corroded, and I was obliged to substitute some other material. I decided upon wood, and this last is ground through which this pipe ran, is, or was, a wet meadow-but has been materially modified my first aqueduct ran for a considerable distance through similar ground, and in that part it was which ran through a sandy soil was not affected.

My third enterprise in the aqueduct line, was on a more extended scale, and in giving an acprobably the most extended individual enterprise large population, its permanency, and its value as an investment, an account of it may perhaps be worth the space it will occupy.

The town of Springfield, where I have lived for near half a century, had always been poorly supplied with water. There were a few poorly constructed private aqueducts, but the population depended mainly upon wells, which afforded indifferent water for drinking, and almost impracticable for washing. I sought what I deemed a good source for water, gushing from the sowing of grass seed for this year, but the results bowels of the sandy plain above us, and of the of an experiment which we found recorded in then invited attention of several prominent citi- ated the facts there laid down. zens to the subject, who I knew had quite as We long ago were convinced that the usual ing. This was in the spring of 1843.

various matters of convenience and expediency. and that followed by the roller. ingly simple, like many other valuable improve- minate at the depth of two and a half inc ments and inventions.

out having been a Boston boy myself, forty years before, I remembered the Jamaica Pond aqueduct, and that it was constructed with logs. At Boston I found several conveniences, not in use elsewhere. But the great idea-and worth more than all the rest-that I received there, was to lay my logs deep. For this idea I was indebted to Thomas A. Dexter, Esq., who was princi-Our Home, our Country, and our Brother Man pal director of the old Boston Water Works.

He remarked to me, that wood was a very good material for conducting water, and if laid Being engaged in putting down a short aqueduct deep enough, it would out-last iron. He repeatfor the purpose of supplying house and barn-yard, ed with emphasis, deep enough, to impress the at all times, with water, we very naturally made importance of it on my mind, and I have taken the logs quite recently that will speak for them-

inst., in regard to the "best kind of pipe for ly, and will now say that in eighteen miles length of wooden pipe, which is now laid and used, I bringing water," by stating my own experience.

Nearly forty years ago, in connection with a have reason to believe that at this moment, nineneighbor, I constructed an aqueduct of drawn tenths of it is as sound as the day it was laid. lead pipe of three-fourth inch calibre, to supply ourselves with spring water. The fountain was years. My depth, in sandy porous ground, is six on my own land, and not over forty rods distant feet, and in clayey ground, four feet, but in from our houses. We used it at our houses and swampy or meadow ground, scarcely three feet. The idea is to put the timber below the changes used in this town or vicinity, so far as I know; of temperature. There is another advantage in laying deep, and not a slight one. It keeps the structed by a mechanic a year or two previous, water about as cool as when it is in the spring, and obviates the objection to aqueduct water,

that it is insipid for drink. I will now give an example in proof of the advantages of deep laying. I furnished pipes for a tribute its preservation from corrosion to the premiles in length, and they chose to dig the ditch. My next was about thirty years ago, in constructing a pipe of two inch calibre, on a new locality to supply some twenty or twenty-five customers. This pipe was made very heavy, as it was particularly desirable, for exactly and the structure of the line decayed within seven years. it was particularly desirable, for special reasons, that it should not often need repairs. I was

I have deviated somewhat from the simple quessiderable trouble with it, for a time, I was led to make a thorough examination, when I found pipe for bringing water," hoping that my experience may be beneficial to others, if not to himself. I will remark, however, that as to the in good order now, after having been in the poisonous effects of lead pipe, I used constantly, in good order now, after having been in the ground for twenty years. I would state that the lead pipe, and neither my family nor myself experienced any bad effects, nor have I ever known by draining and filling—and I would remark that a well authenticated instance of the injurious effects of such pipe, but I have heard of such instances, and it is probable that they have existed that the corrosion took place, while that part the corrosion took place, while that part the mains to houses and other places where the water is used, are of lead. I have lately received a printed statement of an aqueduct constructed in Pittsfield, Berkshire Co., in this State, within count of my experience, I may possibly be more minute than would be desirable. But it being in Pittsfield, Berkshire Co., in this State, within a few years. The main pipe of this aqueduct is constructed of Ball's patent indestructible of the kind in New England, and one in which I took especial pains to introduce all the conveni- quainted. But I notice, that the expense of this ences that I could find far and near; and it being aqueduct is fully treble that of timber, and if there were never any expenses for repairs upon it, an enterprise which has been crowned with comcost would keep the Springfield wood aqueduct in repair for all time to come, and divide a large surplus for the owners.

The timber aqueduct is manufactured here by Mr. Ezekiel Keith, who will answer any question as to price, &c. CHARLES STEARNS. Springfield, Mass., 1858.

INTERESTING EXPERIMENT IN SOWING GRASS SEED

It may be a little late to call attention to th purest and softest quality, and I secured by pur- the Ohio Valley Farmer for May, struck us at chase the spring and the right of way to a public the time quite forcibly, and some trials and obroad at once, and at a very moderate charge. I servations of our own since then, have corrobor-

much personal interest in the introduction into mode which many of us practice in sowing and our village of pure water as myself, and a good covering grass seed by harrowing them in with deal more money to spare to invest in it, but grain, is not a good method-that many seeds no one seemed to have confidence in its suc- are thus buried too deep to vegetate, and, if not cess, and each declined joining in the undertak- entirely lost, are nevertheless laid up in a dormant state, and therefore useless, until they Being in the timber business, and having on shall be brought into a condition to germinate hand a considerable amount of timber suitable by another turning over of the soil. The best for pipes, and conveniences for manufacturing, I "catch" of grass that we ever obtained, was procured a set of tools for manufacturing, of sown upon a field of wheat after the grain had different calibre, and employed an experienced been harrowed in, and the field smoothly rolled. man to bore and fit them. While the work was The seed (herdsgrass and clover) were sown by going on, I visited various places where aqueducts means of a "Wells' Seed Sower," and covered were established, to acquire information as to by passing a spring tooth horse rake lightly over,

Among other places, I visited Syracuse, in the But to the experiment mentioned. A write State of New York, where I learned that a com- in the above named paper, over the signature of pany was introducing water into that city, much "G. T." says that he made a trench in a favoraon the plan that I was pursuing. I learned, ble situation three and a half feet long, increasalso, that the State of New York had used wood- ing in depth from the surface at one end to the en pipes to conduct their salt water from their other end where it was six inches deep. The saline wells to the various points where it was bottom was an inclined plain, and was made used for the manufacture of salt. These works smooth and even by pressing a straight edge had been in use many years, and I presumed that board forcibly upon it. Thus prepared, the seed long experience had suggested improvements in was sown thickly in the trench its whole length. the manufacture and laying of the pipes, not In twenty-four days, at an average temperature generally known. Nor was I mistaken; and my of 45°, the plants appeared at the surface for four journey there was important in its results. I inches from the shallowest end towards the deepfound, at Syracuse, augers for boring, and tools est part of the trench, and afterwards continued for fitting the logs together, so perfect, that I to appear from still deeper parts of the trench bought a set at considerable expense, and laid for seventeen inches, when it wholly ceased to my own aside. I also learned the mode of char- vegetate. Three months elapsed and not a leaf ring the insides of the pipes, a most important showed itself beyond the last named point." On operation, as it has the effect to prevent the wa- examination, the writer goes on to say, that the ter passing through, from being affected with the clover and timothy (what is known in Maine as taste of the timber. apon the light snows that frequently fall in April field."

It will also appear evident to every one, that such of the seed would be buried by the harrow ore than two and a half inches, and beyond for a safe and sure cure for sores on horses: this depth G. T. says the seed would not vegetate, that is, the clover and herds grass, and con-

AMMONIA IN THE BLOOD.

The blood has not inaptly been called, by Prof. Amory, the "soil of the body." From the blood is derived all the material which constitutes all the various substances of which it is composed. As plants flourish well and strong which grow in a soil which contains all the ingredients in due proportions which are necessary for them, so does the animal form grow well and strong when the blood contains, in due proportions, the ingredients which are necessary for it. Let the soil be deficient of any material which the plant requires and it languishes, or if any ingredient be in excess it becomes unhealthy. So it is with the animal system if any required ingredient be deficient or any material be in excess.

Recent researches and investigations of physilogists have ascertained that ammonia exists in the blood, and when in proper proportions, administers to the health and strength of the body, in the formation of the fibres of the muscles and

the albuminous portions of the body. They have also ascertained that a deficiency of mmonia in the blood causes disease, and that an excessalso is a fruitful source of disease. Ammonia onsists of a combination of hydrogen and nitrogen. The world is full of these two gases, and when they accumulate beyond a natural amount, the ammonia is taken into the lungs, enters the blood in too great quantities, and fevers and other diseases are the consequence. The "soil of the body" is surcharged with ammonia, and the body suffers from an excess of it.

Dr. Richardson an English physician has published, in a medical essay, some very valuable ob-servations on this topic. When the blood becomes surcharged with it, he has detected it in the breath of the people, who are rendered sick in consequence of it. Thus he has detected it in malignant fevers.

An excess of ammonia is generated where vegemulates in crowded and unventilated rooms. Indeed, wherever you find impure air you may susair is unfit for respiration, because it is taken into the lungs, thence the blood, the "soil of the body" becomes loaded with an excess of it, and the body becomes diseased as a natural consequence. Airtight houses, airtight sleeping-rooms, airtight churches, airtight school-houses, are all fruitful sources of disease from the accumulation of this substance, this alkali of blood as it has een also called, the proper proportion of which is a source of health, and a disproportion of which as surely bringeth disease and death.

HOW TO MAKE BAD BUTTER

So many of our able correspondents, says the Genesee Farmer, have told us how to make good butter, that it may be interesting to some of our readers to learn how to make bad butter. Our respected friend Peters, of Genesee county, furnishes the Rural New Yorker some excellent of excelling in this particular branch of rural

"The first step to be taken is, of course, to the breath of persons suffering with typhoid and get your cows. If you purchase in the spring, get those which have been so badly wintered that they can hardly get up alone. If you have to table and animal matter decomposes. It accuthem any shelter, no matter how bad the weathpect the presence of ammonia, and hence, such er may be. If possible, do not give them chance to get on the warm side of the barn or shed during snow storms, or cold storms of rain and snow. A little comfortable care might be injurious when they come to be milked in the spring. Keep them on musty, boggy hay, or rotten straw, and fodder when most convenie only not too often. If this system is faithfully dhered to, and the cow is fool enough to live through and have a calf, the milk will be innocent of anything but a weak thin cream.

"Having obtained the milk, there are various ways for getting the cream. The most approved is to put it through a strainer that will stop a A Large Hog. Mr. Nathan Bachelder, of good sized potato, as by that means you secure Jnion, killed a fine hog on the 21st ult., of such an admixture of foreign substances as will which a correspondent gives us the following par- ensure the adhesion of the particles, upon the ticulars :- He was brought from Portland when same principle, I suppose that masons mix hair four weeks old, and was of the Mackay breed. with their mortar for plastering. RUTA BAGAS AND OTHER ROOT CROPS. THE PATTER OF LITTLE FEET. The time is approaching for sowing roots, and perhaps the following may be an inducement for those that have not as yet grown any, and who therefore are ignorant of their value. I shall show them what can be done by bad treatment,

Last June I had a piece of ground that we

could not get into a fit state for corn. I there-

and in an unfavorable season.

fore determined to have a crop of roots, and the only preparation it got (without manure) was plowing, harrowing and rolling. I draw the drills thirty inches apart with the corner of a draw hoe; a man will run his hoe along as fast as he can walk, and straight enough after one straight line is made. I then sprinkled a little super-phosphate of lime along the mark so made, this being sufficient to give the seed a quick start, and set a couple of quick-walking men to sow it in the following manner: Take some seed between the fore-finger and thumb, about as much as you take on the end of your finger when looking at clover seed, and drop three seeds a foot apart, carefully keeping the thumb and finger in motion, and walk quick; half a dozen seeds will perhaps drop in one place, and then perhaps but two, but this is evener and better than I can get a drill to do it. This is a quick way, for the men will try who can get out first, and you can conclude the quicker they move the evener your seed is going When all is sown, I set them at one end of the field, and get them to "herring bone" it, which is done by placing the two heels together, and moving the right heel into the hollow of the left, and vice versa-the closer the heels are kept together, the better the seed is covered. The hands should be placed behind the back crossed, which enables the worker to move along quicker and with more ease to himself, it being as a balance to the body. This is a light covering, but all that is necessary for turnips; I then

run the roller over them and they are finished. When they have made their rough leaf, I run Knox's horse hoe through them, to keep the weeds down and keep the plants growing. When the plants are about four inches high, I set the hoes on to thin them, they being about the distance you want them from this method of sowing; they cut each side, which takes your extra plants out, leaving but one plant standing When they are done thining, set on your horse hoe again to loosen your soil, this is all the hand hoeing you want if you keep the weeds down, as the use of the horse hoe afterwards will row a sufficiency of loose mould between the to weed growing. I raised on this piece (one recipes to your readers. and cornstalks; I am now feeding ruta bagas.

bjected to, as being too expensive to raise. I have always found that such objectors are men first ripe and fresh, mash and drain through a nothing about them. A man who has tried them once will repeat the practice.

As for their tainting the butter, it is all moon hine, and another excuse for not growing them. If a man wishes to have his butter taste turnipy, he can very easily effect, and as easily prevent it. When the above amount can be taken off with such bad treatment, they can see what can be done by good treatment, which consists in plowing your land two or three times, harrowing and rolling as often as necessary to get a good tilth, with a proper quantity of stable manure applied broadcast, or drilled in when scarce. In lling manure in, I open drills same as for lanting potatoes, laying the manure in the botom, turning the drills over as before: then and as soon as the whole mass is raised to the run the harrow with the teeth up crosswise, or boiling point, dip it while boiling into the cans. an old gate, which levels the earth and still (glass is better than tin for such acid fruit,) and leaves it sufficiently high that the rows where the pour over the fruit in each can a little boiling manure is can be seen to sow on; then roll, keep- sirup, nearly thick enough to candy. Fill pering your ground level, as turnips and mangel feetly full, and seal air-tight at once. These are wurtzel will not do here on raised drills, as in very fine, eaten with cream. Surope. Our sun is too strong, and when on drills, as fast as the roots come to the side they serving. If dirty, do not use them. Straube uch moisture as we possibly can, and we can hot. [J. C. If sia and capsicum, in the proportion of one pound you think your ground is too rich, do not sow maize leaf to four ounces of quassia, and half urnips; sow instead of them, mangel wurtzels; an ounce of capsicum, will produce it is said, a for this crop the richer the ground is the better, good substitute for tobacco in the manufacture s it costs as much to work a half crop on the of cigars. ame piece of ground as it does a whole one.

G. HOWATT. Newton, N. J. [Country Gentleman.

VOLUNTEER GRAIN. At the ranch of J. P. Jurnhy, says the Sacramento Union, one mile bove Patterson's Station, in this county, are one undred and sixty acres of grain, which is all a olunteer crop. One-half is barley, and the reainder wheat. The grain is well headed out. he barley being uniformly about four feet high, and the wheat five feet. The whole cost of harowing the land, which was the only expense in the matter, was one hundred dollars. It is estimated that the whole crop will average from thirty to thirty-five bushels per acre, leaving a wide the board. \$10,000 was appropriated for the argin for profits.

Up with the sun in the morning, Away to the garden he hies, To see if the sleepy blossoms Have begun to open their eyes Running a race with the wind, With a step as light and fleet, Under my window I hear

The patter of little feet.

Now to the brooks he wanders In swift and noiseless flight, Splashing the sparkling ripples Like a fairy water sprite. No sand under fabled river Has gleams like his golden hair, No pearly sea-shell is fairer

Than his slender ancles bare; Nor the rosiest stem of coral That blushes in ocean's bed. Is sweet as the flush that follows Our darling's airy tread.

From a broad window my neighbor Looks down our little cot. And watches the "poor man's blessing"-I cannot envy his lot. He has pictures, books and music, Bright fountains and noble trees,

Flowers that blossom in roses, Birds from beyond the seas; But never does childish laughter His homeward footstoops greet, His stately halls ne'er echo To the tread of innecent feet.

This child is our "speaking picture," A birdling that chatters and since. Sometimes a sleeping cherub-(Our other one has wings)-His heart is a charmed casket, Full of all that's cunning and sweet, And no harp-strings hold such music As follows his twinkling feet.

When the glory of sunset opens The highway by angels trod And seems to unbar the city Whose Builder and Maker is God. Close to the crystal portal.

I see by the gates of pearl The eves of our other angel-A twinborn little girl. And I ask to be taught, and directed

To guide his footsteps aright. So that I be accounted worthy To walk in sandals of light, And hear amid songs of welcome From messengers trusty and fleet, On the starry floor of Heaven, The patter of little feet.

HOW TO PRESERVE STRAWBERRIES. Having had a large supply of this fruit last plants, which will smother the weeds until such year, and very little of any other fruit, we pretime as the size of the leaf or leaves occupies served in a variety of ways, all which kept so the space between them, when there is an end perfectly, that I have been requested to give my

acre) of ground on which we could not at that STRAWBERRY PRESERVES. Select the largest time (since drained) grow any other crop, nine and handsomest berries, weigh them, and spread hundred and thirty bushels of ruta baga turnips, on platters. For each pound of fruit, allow a which has been a great saving the past winter pound of powdered white sugar. Sprinkle half to the corn crib. I fatted one pair of oxen, and this amount over the berries, and let them stand kept upwards of twenty head of horned cattle several hours in a cool place, to harden and to n them and mangel wurtzel, clover hay, straw, form liquor. Put them in a porcelain lined kettle, and by degrees strew on the rest of the sugar. My object in stating the above, is to show Boil them slowly fifteen minutes, skimming thorfarmers that root crops are not so extra hard to oughly, then take them from the sirup and spread raise, and that they can raise them to advantage again on platters, to cool and harden into shape. vithout using up their best land, and costing too Then put them into wide-mouthed glass bottles, much for the working of them. Root crops are pour the sirup on boiling hot, and seal the jars. STRAWBERRY JELLY. Take the berries when

who never raised any root crops, and know flannel bag. To each pint of juice put a pound of white sugar, and one-third of the white of an egg. Boil slowly about ten minutes, skimming thoroughly, then dip it into tumblers or cups, and set it into a sunny window uncovered till it iellies, then seal them over. It will never form

a very firm jelly, but it is delicious and beautiful. STRAWBERRY JAM. Small and poor berries will answer, if clean and free from decay. Mash with a wooden pestle, add to each pound onefourth of a pound of brown sugar, boil about fifteen minutes, and seal up in earthern, glass, or

CANNED STRAWBERRIES. Put the berries over Strawberries should never be washed for pre-

are burnt up, and the crop spoiled. In Europe ry short-cake is a luxury. Make a large thick they cultivate all on drills, but theirs being a mojet short-cake, split it twice through, and spread climate, their object is to draw the roots out and with butter and a layer of fresh strawberries and keep them dry, while our object is to supply as sugar, put the parts together again, and serve

SUBSTITUTE FOR TOBACCO. If people will make pplied to the turnip crop; I have used it at the chimneys of their noses, the best way is to furay; you can have your ground too rich for find in the Patent Office Report, a "preparation

"Havanas" is a sun-flower leaf.

AGRICULTURAL COLLEGES. The Legislature of Iowa, at its session in March, established an Agricultural College, and has set apart public lands for its endowment. The farm is to consist of not less than 640 acres. Wm. Duane Wilson, Esq., editor of the lowa Farmer, one of the trusteen named in the act, has been appointed secretary of purchase of the farm.

A bill to establish an Agricultural College in INSECTS. A bright fire of resinous pine, tar, Minnesota had passed the Legislature, and the havings, or any other combustible, kindled in same located at Glencoe, McLeod county, near the garden at night, on a platform erected for the centre of the State. The younger States are year; human enjoyment and health, and even that purpose, will attract and destroy millions of actually going ahead of those old enough to be life, would be promoted by it.

DOMESTIC RECEIPTS.

SELECTED FROM VARIOUS SOURCES.

To Corn BEEF FOR SUMMER. Take the brisket plate, or any good piece of fatted beef, fresh killed; saw, and cut up in three or four pound pieces, sufficient for one or two days; lay it in a half barrel suitable for beef, or a lard keg. Make a good strong brine with cold water, strong enough to float a fresh egg, dissolve half an ounce of saltpetre and put it in the brine; lay in the beef, put a clean flat stone on it to keep it down, and pour in the brine, sufficient to cover it; let it lie over night; boil it in water enough to cover it; add a handful of salt let it boil two or three hours, or until tender. This will keep one or two days in a cool place.

N. B. Put some salt in the barrel or keg that you salt your meat in once in a while, that will keep the brine always strong and good.

To PRESERVE GOOSEBERRIES. Take fullgrown gooseberries before they are ripe, pick them, and nut them into wide-mouthed bottles; cork them gently with new, soft corks, and put them in an oven from which the bread has been drawn, let them stand till they have shrunk nearly a quarter; then take them out and beat the corks in tight; cut them off level with the bottle, and rosin them down close. Keep them in a dry

GOOSEBERRY JAM. Pick and clean red gooseberries, thoroughly ripe. Boil them by themselves for twenty minutes, skimming them frequently; then add brown sugar in the proportion of one pound of sugar to one pound of fruit; boil for half an housafter the sugar is in; skim it and pour it into earthenware jars; when cold, paper up the jars, and set aside in a dry cool situation. Strawberry and black current jams are made in precisely the same manner as the above; but instead of brown use lump sugar.

CHERRY, GOOSEBERRY, OR CURRANT, AND RASP-BERRY PUDDING. Make a good crust, and line a pudding-basin, previously buttered, with it; pick your fruit and fill the basin; put in a very little water and some sugar, wet the edge of the paste all round, then cover the top with a crust and pinch the edges together; tie a cloth tightly over, and boil the pudding for an hour and a half, or two hours, according to its size. When you take it out of the pot, dip the basin into cold water, then turn the pudding out.

How to DRY CHERRIES. Take the stems and stones from ripe cherries; spread them on flat dishes, and dry them in the hot sun or warm from them, a little at a time, over them; stir them about, that they may dry evenly. When they are perfectly dry, line boxes or jars with white paper, and pack them close in layers; strew a little brown sugar, and fold the paper over, and keep them in a dry place.

TO MAKE EXCELLENT SPRUCE BEER. Two quarts of boiling hot water; eight quarts of cold water. In the hot water add twenty-five drops each of the oils of spruce, sassafras, and wintergeen; three cents' worth of yeast; three pints of moasses : mix it and let it stand all day, then bottle it. Put the molasses in the cold water after the oils are all well mixed in the hot water; add all to the sweetened water; last of all add the yeast. If made in the morning it must be bottled at night. Half a goblet of dock root boiled in the water is healthy.

DOMESTIC GINGER BEER. Two gallons of ginger eer may be made as follows :- Put two gallons cold water into a pot upon the fire; add to it two ounces of good ginger, and two pounds of white or brown sugar. Let all this come to the boil, and continue boiling for half an hour. Then skim the liquor, and pour it into a jar or tub, along with one sliced lemon, and half an unce of cream of tartar. When nearly cold, put in a teacupful of yeast, to cause the liquor o work. The beer is now made; and after it as worked for two days, strain and bottle it for se. Tie the corks down firmly.

How to Cool Water. If it is desired to cool water for drinking in warm weather, and ice cannot be obtained for this purpose, let it be kept in an unglazed earthenware pitcher, wrapt around with two or three folds of coarse cotton cloth, kept constantly wet. The theory of cooling water in this manner, is the absorption of heat from it by the evaporation of the moisture in the cotton cloth. Expansion produces cold, comression heat.

FRUIT SEASON.

Lovely June has come, and the delicious strawerry will soon be here, to be followed in succesion by other berries, until the fall, showing at once the wisdom and beneficence of our comme Father. How to use them wisely, and thus derive the fullest advantage from that wise benefience, it is worth while to know. The earlier in he day fruits are eaten the better : they should e ripe, fresh and perfect, and eaten in their natral state, with the important advantage of its eing almost impossible to take too many; their ealthful qualities depend on their ripe acidity, but if sweetened with sugar, the acidity is not only neutralized, but the stomach is tempted to eceive more than it is possible to digest, and if ream is taken with them, the labor of digestion pereased: hence the fearful attacks of cholera norbus which sometimes follow the free use of ruits and berries with sugar and cream. No liquid of any description should be drank

within an hour after eating fruits, nor should anything else be eaten within two or three hours after-thus time being allowed for them to pass out of the stomach, the system derives from them all their enlivening, cooling and opening influences. The great rule is, eat fruit and berries while fresh, ripe and perfect, in their natural state, without eating or drinking anything for at least two hours afterwards. With these restrictions, fruits and berries may be eaten in noderation during any hour of the day, and without getting tired of them, or ceasing to be nefited by them during the whole season. It a great waste of lusciousness that fruits and berries, in their natural state, are not made the sole dessert at our meals for three-fourths of the

AUGUSTA: THURSDAY MORNING, JULY 8, 1858.

THE POLITICAL CONVENTIONS.

The two political parties of our State has now held their annual conventions, and placed their candidates for the Governorship and their respective declarations of principles, before the people, for their choice at the approaching fall

The first convention was called by the Republicans, and was holden at Mæonian Hall, in this city, on the 24th ult. There were about 600 delegates present, and the convention was addressed by Hons. Sam'l P. Benson, Lot M. Morrill, Wm. P. Fessenden, and others. On the ballot for candidate for Governor, 512 votes were thrown, all of which were for Lot M. MORRILL, our present Governor, and he was accordingly unanimously re-nominated. A series of resolves were adopted, setting forth the aims and objects of the Republican party in Maine, and the Convention

The Democratic Convention was held at Winthrop Hall, in this city, on Wednesday, 30th ult., and was attended by 657 delegates. Speeches were made by Hons. A. Treat, J. W. Bradbury and N. S. Littlefield, Daniel T. Pike, Esq., and several others. The convention unanimously nominated Manassen H. Smith, as candidate for Governor. Resolves were passed, among others, endorsing the National Administration, and declaring the Democratic party to be in favor of Merz. suitable laws for the regulation of the sale of intoxicating liquors.

The large attendance upon these convention evinces that there is much interest felt in the approaching election; and the candidates of the two parties, and their respective "platforms," being now placed before the people, their claims will doubtless be fully and forcibly set forth by the party papers and orators. In due time, we shall give our readers the results of their labors and arguments, as shown in the vote of the people, in September, -and in the meantime, we shall endeavor to keep them informed of any important changes, in either party, and to steer clear of the Seylla and Charybdis of politics, by pursuing, as has always been our wont, a perfectly impartial and neutral course on all political

FIRES IN THE WOODS.

The Bangor Courier states that during the past week there have been extensive fires in the woods in that vicinity burning over much woodland, and destroying large quantities of cord wood. On Thursday evening, says the Courier, the fire had reached on Essex street as far down as the woodland of Mr. Mark Mills and Mr. Rufus Prince. Across their lots, 200 or 300 acres in extent, it was running before the strong wind with great rapidity. To the north and east of this locality the fire was also raging. It was within a quarter of a mile of the M'Question mill at Pushaw, where Mr. Pitman has two or three hundred cords of wood piled. The barn near by it was thought would be burned last night and probably the wood also. The inhabitants were many of them fighting the fire all

Mills, 75 cords; Reuben Bagley about 40; Mr. Moore, 30; Mr. Lord, 25; Mr. Colby, 15; Mr. Sawyer, 15; Mr. Prince, some wood and bark, with some other losses

BANGOR LUMBER MARKET. The surveyor's resix months ending July 1, show quite a falling off from the aggregate amount surveyed during the same period in 1856, and also a decrease from the last year. The following are the figures:

Green pine, 20,523,715 15.935,206 14,312.989 7,417,612 8,402,484 5,511,193 25,349,998 22,617,498 24,783,146 4,912,027 4,988,931 7,210,519

58,203,352 51,944,119 51,817,847 It will be seen that hemlock timber has considerably increased, while pine has rapidly decreased. Pine lumber is getting scarce, the most of that which stood upon the head waters of the large rivers of Maine, or upon their tributaries, having been cut to such a distance from their banks that it is no longer profitable to haul it to the water. There is a vast deal of pine forests, however, yet standing in Maine, and we expect the hardy settlers of Aroostook will yet give us a good account of some portion of it.

INDEPENDENCE DAY. The fifth passed off in more than usually quiet manner. Save the visit of a company of Fantastics, from our neighboring city of Hallowell, we had no celebration of and kind, here. Bath and Portland drew many of our citizens to witness their rejoicings, and we understand their visitors were generally well satisfied with their entertainment.

We hear that a boy in Hallowell had his hand badly injured by the discharge of a pistol which he was loading. We go to press at too early an hour, to obtain any particulars of accidents or celebrations.

DEATHS FROM YELLOW FEVER. The yellow fever is very prevalent, at present, in Havana and other West India ports. By late arrivals we have intelligence of the deaths from this disease of the wife and only child of Capt. Chas. N. Bates, of this city, who died in the hospital at Havana, after a sickness of only four days. Capt. Lorenzo D. Gaslin, of this city, master of the brig Eudoras, of Portland, also fell a victim to its ravages, at Matanzas, on the 14th ult. He leaves a wife in Portland, and a large circle of friends and relations to mourn his loss.

APPOINTMENTS BY THE GOVERNOR. During the past week, the following appointments were made

by Governor Morrill : Railroad Commissioners .- William Willis Portland; George P. Sewall of Oldtown; Ed-

ward H. C. Hooper of Biddeford. Trustees of Insane Hospital .- Joseph Barrett of Canaan; Alexander Burbank of Lewiston.

SAW MILL BURNED. We learn that the town steam mill, in Gardiner, was burned on the morning of the 5th, together with some lumber piled in the yard. It had recently been undergoing repairs, preparatory to starting up again. It was set on fire. We have no reliable particulars, but there is a report that the incendiaries

TALL GRASS. Mr. Stephen H. Branch, of this eity, brought us in a sample of the tall grass about his dwelling, in the shape of a stalk of witch grass measuring 5 ft. 8 in. in length. Very good, that, considering the dry weather we have

ABSENT. The absence and illness of the Editor, during the past week, must serve as an excuse to readers and correspondents for any short comings in our editorial columns.

MRS. HALE'S RECEIPTS FOR THE MILLION. T.

EDITOR'S TABLE.

large volume, 720 pages. Price, postpaid, \$1,25. every description of cookery,-directions for doing all kinds of needlework and embroidery,rules for the preservation of health,-parlor amusements .- and, in short, almost everything which one wishes to know about. We shall copy some of her receipts before a great while, and thus give our readers a sample of the work.

Boston Tax Book. We have received, through Messrs. A. Williams & Co., Boston, a list of those persons and corporations in the city of Boston, who paid taxes upon \$10,000 and upwards during the year 1857. Published by Geo. C. Rand & Avery, City printers. This is a neatly printed work, and quite interesting as showing the standing of the "solid men of Boston," as regards this world's gear. For sale by C. A. Pierce, Augusta.

NEW MUSIC. We have received from the pub lishers, Oliver Ditson & Co., Boston, the following pieces of new sheet music:-

S'eigh Bell Waltz: by T. Bricher. Foating on the Wind; ballad-composed by Stephen Glover.

Where are the friends of my youth? balladcomposed by George Barker. There is an isle, a bonny isle-or, "My hon is there"; -composed by Wheateley Kirk. Songs of the South; "It is the Miller's Daugh-

A Maid reclined beside a stream : ballad-com posed by Harry Keith.

Besides the large list of their own publications. Mesers. Ditson & Co. are in constant receipt of all the new pieces of the best composers, and will send any piece of music, postpaid, on of the Spratt, or glass ring rod. receipt of the price. The pieces noticed above are published at 25 cts. each.

PRISONERS ESCAPED. On Sunday night, 27th ult., six prisoners escaped from the Portland House of Correction, five of whom had been forging an order on Mr. Ballou—and a lad named of screws: Pote, sent to the House for creating a disturbance. The colored men, and Porter, were recaptured on the same night, but Kinney and Davis had wick Telegraph of July 1st, 1858: not been retaken, up to Monday. The police are in pursuit, and the Sheriff has offered \$100 for their apprehension.

PUBLISHERS' CONVENTION. The convention of ing was harmonious, and separated, after a very jenced no sensible effect from the passage of

night. Several hundred acres of valuable wood-land have already been burned over, and cord-wood burned so far as we could learn as follows:

Totaland exenanges, that its Betsy Farket, and the base of the base Till she was about 110 she possessed bodily vigor tors was broken. This speaks volumes in praise of the Otis rod. Mr. Pennell informs us that he sufficient to enable her to work in the garden, an employment she took great delight in.

Post Offices. New offices have recently bee established at East Windham, Jeremiah Hawes, turns of the amount of lumber surveyed for the P. M., and at North Brownville, Moses Chand-

The name of the Post Office at Patricktown, has been changed to Somerville, and C. Chisam, Esq., appointed Postmaster.

Levi Caswell, Esq., has been appointed Postmaster of Lubec, in place of Sabine H. Kimball

Friday night, in a building on Hancock st., occupied as a grocery by Thos. McDermott, and thickly surrounded by Irish shops and houses. The fire caught in the shed attached to McDermott's house, and was caused by carelessness in smoking hams. Five or six buildings were burned. and from ten to fifteen families rendered house-

MAINE TELEGRAPH COMPANY. We learn from the Whig & Courier that, at the annual meeting of this company, held in Bangor on the 30th ult., the following named gentlemen were chosen di-Jacob A. Smith, Edward O'Brien, Aaron Hayden, F. A. Butman, B. C. Bailey, W. P. Merrill. At a subsequent meeting of the Directors, H. O. Alden, Esq., was re-elected President.

and the following persons were chosen officers :-Nathan H. Holly, Captain; Lorin Adams, 1st Lieutenant; Dearborn G. Bean, 2d Lieutenant; Charles K. Adams, 3d Lieutenant; Hiram F. Weymouth, 4th Lieutenant.

No. Somerset Cattle Show. The Cattle Show and Fair of the North Somerset Ag. Society will be holden at Solon, on the 13th and 14th of Oc-

their respective Shows and Fairs, at as early a date as possible.

THE ATLANTIC TELEGRAPH. Up to the time of Falls Bank. No clue has been obtained of the our going to press, Tuesday noon, we have received no tidings from the telegraph fleet. The learn that the lear Niagara is momentarily expected at Trinity Bay. Three steamers have arrived, since the expedition Three steamers have arrived, since the expedition ANOTHER TRAGEDY AT SEA. A despatch to the started, but none of them bring any tidings of Merchant's Exchange, Boston, from Holmes Hole, their progress.

ADMITTED TO THE BAR. On Wednesday of last week, during the session of the Supreme Judicial Court, Gardner C. Vose was admitted to the bar, and to the practice of law in all the Courts of was fallen in with by fishing schr. Hall, of Co-

BOOKKEPING. This accomplishment, which is generally acquired at the expense of many lessons and much time, is briefly and effectually taught by that prince of jesters, Punch, in one have short lesson, viz :- Never lend them

Androscoggin and Kennebec Rail Road ConPany. The annual meeting of this corporation was held at Waterville. On account of the fine clear, and cool weather a large attendance of Stockholders was present. The reports of the Directors, Treasurer, Superintendent and Auditors were presented and accepted; from which it appeared that the net earnings of the Road for the year just closed were \$83,368,06. The following named gentlemen were elected Directors for the ensuing year: John Ware, Jedediah Morrill, S. H. Chandler, Rufus Horton, Wm. Goodenow, Samuel P. Benson and Ira Crocker. ANDROSCOGGIN AND KENNEBEC RAIL ROAD COM-

For the Maine Farmer. LIGHTNING CONDUCTORS.

B. Peterson & Brothers have just issued a work by Mrs. Sarah J. Hale, the well known authoress, entitled "Mrs. Hale's Receipts for the Mil-MR. EDITOR :- I noticed in the Farmer of July lion; containing four thousand five hundred and Franklin, Quimby, Spratt, Otis, Lyon, and forty-five receipts, facts, directions, knowledge, lastly the American conductor,) were noticed &c., in the useful, ornamental and domestic arts, and their merits set before the public in a very and in the conduct of life—being a complete family directory and household guide." One rods, excepting the Otis', in the writer's opinion, have met with universal favor and "general The purchaser will find in this work receipts for adoption," and that, on account of its mechan cal construction, is liable to tumble down in a little

> Let me suggest to the writer that the tall about changing the Otis' rod comes with ill grace from one of a company who are now vend ing a rod like those that have been changed for the Otis' rod, by such men in our immediate vicinity, as Daniel Pike, Rev. W. A. P. Dillingham, M. M. Swan, also the U. S. Arsenal buildings, when the glass ring rod was changed in the summer of 1857, for the Otis' rod.

In regard to the diminutive size of the Otis rod, which he says "is not the least objection. I will say that the Otis' rod is square,-now n fact is better established than that the same quantity of metal in a square form presents a greater extent of surface than in a round formconsequently we can give greater conducting power with a square- rod than he can with a round one. Again we have lateral points projecting from every insulator which guard against an oblique stroke, or in case of a heavy charge to aid in dissipating the electric fluid in the air. The above, Mr. Editor, are advantages which the worthy author failed to notice while speaking of the Otis' rod.

In reference to the Otis' rod "tumbling down in a little while" on account of its connections -let me say that the connections are made in ter":-words by Tennyson, music by Charles J. exactly the same manner as the American conductors, the points and insulators of the Otis' being the parts for which a patent was granted and for which superiority is claimed. The American conductors being the old Spratt, or glass ring rod, and receiving a new name, American conductors, on account of the unpopularity

The writer says, the American conductors ar attached to the building by means of a screw Now, it the gentleman will inform us what he means by a screw we should be glad, for we must confess that a large iron staple_running into a placed there for safe keeping while the new jail building does not exactly agree with our idea was being completed. They were Kinney and of a screw. People having conductors applie Davis, the "confidence men," who robbed Wil- will do well to examine both rods, and be cauliams, of Readfield, of \$70-two colored men, tious how they have conductors in the shape of arrested for stealing clothing-Benj. Porter, for bolts driven into their buildings under the name

In proof of the protection afforded by the Otis' rod, we copy the following from the Bruns-During the thunder storm of the 24th

the rods upon the house of Mr. Charles S. Pennell, at Middle Bays, were struck, but the fluid passed off without doing the slightest injury. There are six rods upon the buildings-three upon the dwelling house, one upon the shed Publishers and Editors was held in this city, and two upon the barn; those upon the dwelling last week, at the Stanley House, and the brother-house are connected and are independent of the others. The family (but not Mr. Pennell) were hood was represented by some twenty members at home, and were very much alarmed; they say they perceived no jar in the house, and experpleasant session, with the understanding that an electricity; and that the flash and peal were simpleasant session, with the understanding that an adjourned meeting should be held in this city, on Thursday, Sept. 23. We copy the official report of the proceedings in another column. feet deep-it was penetrated to the depth of four Death of an Aged Lady. We learn from our feet. A small portion of electricity passed down Portland exchanges, that Mrs. Betsy Parker, the rod on the back of the house, puncturing a years before the Declaration of Independence. in perfect condition, and not one of the Insularemoved the Spratt or Glass Ring Rod last summer to put up the Otis rod, Mr. J. K. March

A CASE OF CRIM CON. Last Sunday the boarders at one of our first class Hotels were considerably exercised by learning that a fast young man who had been boarding there since the middle of April last, was only a woman; and what added still more to the interest of the affair, this same "young man" had occupied a room all this time with a Mr. Ward who came here with him or her and commenced business as an upholsterer. A muss was kicked up in about no time. The land resigned.

FIRE IN BANGOR. The Courier of Saturday states that a fire broke out, about 10 o'clock ever, it was learned that they had gone into our neighboring town, Greene, and set up housekeep-ing again in the hotel there. Thereupon officer Lowell was sent to break up the arrangement.

Arriving after bed-time and finding them as expected, he arrested and furnished them separate odgings in the County boarding house. They were tried yesterday before justice Smith, and bound over in the sum of \$300 each. Failing to procure bonds they were again locked up. It was proved on trial that Ward is a married man, and the father of a family. Lewiston is getting to be "quite a thick-settled place." [Advocate.

DEATH OF DR. COLLINS AND NARROW ESCAPE AT DEER ISLE. Dr. Collins, an esteemed physician and honored citizen of Deer Isle, died on Tuesrectors:—H. O. Alden, Jas. Eddy, A. W. Paine, day, the 15th, and was burried on Sunday, 20th and now a resident of Deer Isle, with William Spofford, went over to Rockland in a small vessel to convey some female relatives, five in number, to North West Harbor to attend the funeral. As NEW MILITARY COMPANY. The military spirit prevails to such an extent in Wilton, that an artillery company has been organized in that place, ly clothed. Austin Jones immediately sprang into the water, caught the drowning lady, and with the greatest coolness and exertion to keep up the old lady and prevent her embarrassing his efforts, and at the peril of his life, swam with her to the vessel, on board of which Mr. Spofford, with the assistance of the women, succeeded in getting her safely. Mr. Jones is entitled to much commendation for his heroic conduct in this rescue. [Bangor Union.

HEAVY ROBBERY AT HEBRON. On the 4th inst., toper next.

We should feel under obligations to the Secretaries of the different Societies if they would send us information of the time and place of holding of the amount taken from Mr. Barrett being in a solution of the time and place of holding the secretaries of the different Societies if they would send us information of the time and place of holding of the amount taken from Mr. Barrett being in \$20 bills on the Lewiston Falls Bank; and the remainder in bills on the same Bank, of other denominations. That from Mr. Gross was a \$10

gives the following account of a tragedy at sea:
"Holmes Hole, June 30. P. M., arrived schr. Cameo, Estabrook, from Cardenas for Portland On June 28, the Captain in a fit of insanity, killed the mate (Chas. Miller, of Manches brought into this port. The captain and crew are in charge of the authorities."

HAIL STORM. The tempests caused by the excessive heat of Thursday the 24th inst., seem to have been almost co-extensive with the State. We have now, accounts of a very severe hail storm which occurred on the evening of that day in the town of Sebec, Piscataquis county, and

GATHERED NEWS FRAGMENTS, &c.

Montreal."

The Newfoundland Seal Fishery. This fishery, it is said, has not proved so successful this season as could have been desired. The outfit for the seal fishery the past spring comprised 254 sail of vessels, of an aggregate tunnage of 29,272 tuns, and manned by 11,804 men. A year or two since the number of vessels engaged in the business was little short of 400, averaging 100 tuns each, with an aggregate of nearly 15,000 men.

Heavy Robbery. Albany, July 4. Chas. Blinn,

when at sea, outside of Sandy Hook, they were struck with amazement to learn from the official (too late, one should think) that their tickets by \$50, and that they must be sent back to New York. A gentleman who had witnessed this scene, and who returned to New York, accompanied the young men to the office of the Chief of Police, where he left them to communicate the circumstances of the outrageous swindle practiced upon them. It is to be hoped that energetic measures will be taken to bring some, at least, of the swindlers to justice.

New York. June 28. There were six deaths

Heavy Robbery. Albany, July 4. Chas. Blinn, a drover, was robbed last night at the West Albany Exchange of \$2260. His room was entered by a ladder. The money was all on the Passumpsic Bank, Vt. There is no clue to the robber.

New York, June 28. There were six deaths from sun-stroke in this city on Saturday, and several from the same cause yesterday.

A correspondent of the Herald intimates that Gen. Castillo, a Mexican, now in this city, is negotiating for the purchase of arms, a war

steamer and munitions, on account of Santa An Good Day's Work. One day last week two na, for his meditated descent upon Mexico. men engaged in fishing off Portland harbor 1500 pounds.

Two Murders. Philadelphia, June 29. At an alarm of fire last night, a fight occured between members of the Moyamensing and Shiffler fire companies, in which Samuel Carr, a member of the latter, was instantly killed by a pistol ball through the head. Two other men were wounded. A fracas occurred in the evening on board the last night at Yonkers, while bathing. Mr. A Gloucester ferry boat, in which Mr. B. Neal was until recently cashier of the Farmers' Bank killed. The murderer escaped.

Fire-Duel. Washington, June 30. Private advices from New Orleans state that a destructive fire occurred there yesterday. The steamer Empress, schooner Minnie Schiffer, and a Spanish Other dispatches state that a duel was fought

and Mr. Gibbons of the Crescent, in which the firm of Dunham & Dimon, shipping merchants. latter was shot, and fatally injured.

through the lungs in the duel with 'Hanlon, but some twenty cases on the Coroner's books awaitappears to be improving.

Sale of Congressional Furniture. The desks and other furniture in the old House of Representatives was sold at auction on Monday. The deak so long occupied by Mr. Giddings brought \$2 25. The desk and chair occupied by Hon. John Quincy Adams brought \$50. The bidding died in Brooklyn vesterday from an apoplectic for this furniture was quite animated, and it was remarked by the by-standers that in Massachusetts it would command \$500. The desks occupied city, on cases of death from sun stroke. There by Col. Benton and Mr. McDuffie of South Carolina, brought \$6 25 apiece; the desk occupied by Col. Brooks run up to \$9, and that used by Gov. Wise sold for \$7. The competition on some articles was very great, and the total sales amounted to between two and three thousand dollars.

Journal says the liquor lately destroyed by and imposing, the military turning out with full ranks. Immense crowds thronged the streets Sheriff Hill of that town, was a queer compound. The grass on which it was turned wilted and died that day, while from some of the kegs several draped in mourning, flags were at half-mast on gallons of thick, slimy matter, was turned, the shipping and all the public buildings, and which turned black, and emitted a putrid, sickening odor, on coming to the air.

that has fallen over a large portion of the United States in six weeks, running from the mile long, and reached City Hall at 5.30, where 1st of May to the 12th of June, has scarcely a parallel. The Pittsburg Journal says the average of observation will give about 10 inches in May, the Seventh Regiment and start for Richmond. The coffin seems in an excellent state of preservaand 5 inches to the 12th of June, or 15 inches in 43 days. These rains do not appear to have been local, but extend east and west at least 1000 miles, and north and south half that distance.

Three Girls Drowned. Port Jervis, June 29. sufficient coolness to venture upon the followin yarn from the Machias Republican? bathing in the Neversink River, near his residence, in company with her younger sister and a musket, which was charged with powder and ball, servant girl, were accidentally drowned on Monday evening. The bodies were found about three When he had got some distance into the woods,

Wisch, lett St. John's, Newfoundland, on Thursthe bear fell, severely wounded but not killed day, June 3d, laden with seal oil, for a port in The boy then went up to him and endeavored to Great Britain, and getting ashore in a calm the same night, on a point of land a few miles to the ing sticks down his throat! Not being successful in this he started for home to procure his father's same night, on a point of land a rew littles to the southward of St. John's was abandoned. She was brought back to St. John's the next morning proceeded to the spot where old Bruin lay, and lodged several more balls in his body, but all in lodged several more balls in his body, but all in cargo are supposed to be worth \$22,500. A was finally dispatched with an axe, though not "windfall" for the fishermen occasioned by a lack of wind. .

Fatal Accident. Thomas Collins, an old gentleman about 80 years of age, living in Athens, arose from his bed one night last week, and while in a state of somnambulism, fell down stairs, breaking his shoulder and cutting his rested in this village on Monday last on charge of fraud and swindling, and taken before Esq. Tyler for examination. It appeared on testimo

July 1. A letter to the agent of the Glasgow line of steamers, received per Arabia, states that a portion of the cargo of the wrecked steamer representing himself as an agent for a large man-New York had been saved. Most of the passengers would remain over for the Edinburg, which was to sail on the 26th.

on increase over the same period of last year, as follows: Flour, 61,447 barrels; Wheat, 245,-044 bushels; Corn, 74,233 bushels. The total ncrease in receipts of flour to the present time s 835,436 barrels.

SAD ACCIDENT. A bright little boy about three years old, son of Mr. Nelson Messer, of West Waterville, was drowned in the mill pond at that lace, on the afternoon of Saturday last. His body was found under the gate of the grist mill, but a few minutes, as is supposed, after he fell into the water. Thrice, as we are informed has Death entered this same family thus suddenly three children, who went forth full of life and happiness have been borne in to that afflicted mother, dead-the love-light in their eyes quenched and their innocent prattle stilled May God strengthen her. [Waterville Mail.

FIRE IN FOXCROFT. On Monday morning last between 3 and 4 o'clock, the dwelling house and outbuildings of Mr. Seth Brown in Foxcroft were consumed by fire, together with all his furniture, farming tools, &c. The fire was discovered in the wrist, severing the cords, when he threw his barn, and was communicated to his house; his knife overboard. George was arrested by inmates had benefit in the flames that the inmates had barely time to escape. Mr. Brown saved nothing, we understand, except one bed and part of a barrel of flour. [Dover Observer.]

SINGULAR FATALITY ON SHIPBOARD. While the orig Arcadia, of Orland, commanded by Capt. N. M. Berry, of Stockton, was lying at St. Jago, some weeks ago, the wife of Mr. Shute, the first officer, who was accompanying her husband, fell some weeks ago, the wife of Mr. Shute, the first officer, who was accompanying her husband, fell down the hatchway, and was so severely injured that she died. Subsequently Capt. Herry and Mr. Shute were attacked by fever and died. Capt. Washington Pendleton of Searsport then took charge of the brig, and sailed for Baltimore. We notice by a telegraphic despatch dated Baltimore 28th inst., that the Arcadia put back in three days, with the loss of Capt. Pendleton and three days, with the loss of Capt. Pendleton and disagreement occured in reference to the two seamen. [Belfast Journal.

NEW YORK ITEMS.

Salmon from the Provinces. The catch of salmon about Halifax this summer has been very large. Immense quantities have been exported to the United States. The price in the Halifax market is 5d to 6d per pound. The Portland Advertiser of Wednesday says: "The British and North American Express Company yesterday brought three and a half tuns of salmon from Quebec, by the Grand Trunk Railway. They were shipped to Boston last evening by steamer Montreal."

NEW YORK ITEMS.

Bogus California Tickers. The sale of spurious California tickets says the New York Times, still continues, notwithstanding all the efforts of the public press to put travelers on their guard. A case of extreme hardship in this way to two young men of the name of Jones, from Wisconsin, elicited the sympathies of passengers on board the Star of the West on Monday last.—These brothers, as they stated to the Chief of Police, were induced by a tavern-keeper to buy their California passage-tickets from his acquaintance. Upon presenting them for inspection, when at sea, outside of Sandy Hook, they were struck with amazement to learn from the official

The Secretary of the Interior has rendered an important decision in the case of the alleged pro-prietors of Superior City, on a question involv-ing conflicting pre-emption claims. They failed to show that they had settled any improved land for their own benefit, and it was in evidence for their own benefit, and it was in evidence that they were employees of others, under whose direction and for whose benefit they acted; therefore the claim is invalid, and was ordered to be canceled. This decision establishes the precedent that neither of the acts of 1841 and 1844, for the relief of citizens of towns on the lands of the United States, refers to town sites not already occupied as such at the time of their passage, and that the parties must be actual occupants of the town in order to enjoy the advantages they confer.

broken up.

The Secretary of the Navy has instructed the Ine Secretary of the Navy has instructed the Bureau of Construction to prepare a drawing of plans for building, without unnecessary delay, the eight vessels of war recently authorized by Congress. Two will probable to the Congress. Congress. Two will probably be constructed at the Philadelphia Navy Yard, and one at each of the other Yards, with the exception of that at Washington. It is said that the side-wheel steamer for the China seas will be built at the California Navy Yard.

The Secretary of the Navy intends leaving Washington shortly for the purpose of inspecting the Northern Navy Yards.

It is said that the affairs of Mexico occupy the attention of the adminstration

NEW YORK, June 30. (Times' Washington correspondence.) The Oregon war rumors are an undoubted fabrication. Mr. Mullen's letter was not official, and it is believed here he was imposed upon. Captain Swords, Quartermaster at San Francisco, writes that he had received information of the reverses of the troops, and states that he had been requested to hurry forward reinforcements and supplies. The Oregon steamer arrived at San Francisco only a few hours before the sailing of the Panama boat. Gen Clarke sends nothing to the Department, but his Adjutant, Capt. McCall, writes that the rumors of disaster are unfounded.

The small steamers of the Gulf squadron are ordered to return home immediately; the large ships are ordered to rendezvous at San Juan. Orders have been issued for the re-disposition of the troops originally dispatched for Utah, while Gen. Harney is to return to the command ments are made under the belief that the Mormons are sincere in their pacific protestations; but should it prove otherwise, it is made discretionary with Gen. Harney to abrogate the present and enforce the previous orders. A considerable body of men is to be pushed forward immediately to Fort Walla-Walla, in Oregon, to

act against the hostile Indians.

The Times' Utah correspondent states that the Peace Commissioners left Camp Scott previous to June 5, for Salt Lake City. It was ascertained beyond a doubt that the Commissioners had no authority to prevent the army pursuing its march, but on the contrary that its entrance into the Valley would be insisted on as a sine qua non.

Washington, July I. A contract has been concluded by the Post Office and Navy Departments with the Pacific Mail Steamship Company the mails between Astoria and Panthagainst the mails and panthagainst the mails and panthagainst the mails and panthagainst the mails and panthagainst th

W. H. Davidge has telegraphed to Post Office Department that he has made an arrangement with the Tehauntepec Company under the extension to the 1st of October, 1859. The entire Territory of New Mexico has been onstituted a new land district. Wm. Pelham \$100,000, and asks for a six months' loan to pay has been appointed Surveyor General, and the lands will soon be brought into market and opened to pre-emption. The land office has information of the immense richness of the soil in precious metals, particularly the Mesilla Valley.

Baron de Wettersedt, Minister from Sweder and Norway, has presented his credentials.

Lieut. Gen. Scott has left Washington for his

head-quarters.
Dispatches received at the Mexican Legation to-day are silent upon the subject of the Ameri can Minister demanding and receiving his passports. Such a report, however, was current at the capital. Our government also received ad-vices, but their contents have not transpired. Civil proceedings were continued against foreigners who refused to pay in their contribu-

gether with Americans, had sought protection from Minister Forsyth. Washington, July 2. Secretary Thompson organizing the Commission to run the boundary line between Texas and New Mexico. The exploration and survey cannot fail to be extremely lifficult, as there are long stretches of country entirely destitute of water and vegetation.

The government has received a letter from Major Ben. McCulloch, dated Camp Scott, in which he states as his belief, that one of the reasons why the Mormons deserted their habitations to guard their women from the apprehended excessive gallantry of our soldiers, and besides that the leaders resorted to this exodus to keep the people and prevent the disaffected Saints fro throwing themselves on the Army for protection. The Mormons, he says, do not believe the Army has orders or authority to pursue them, and hence congratulate themselves that they are out of harm's way from that source.

Col. McCullough says a small force of Mormons is still in Salt Lake City, ready to fire it, perhaps, in the event of the approach of the army. He thinks a great mistake has been committed in permitting the Mormons to gather their crops, as this, while it strengthened them, dimini relatively the power of the military forces. I was still reported that the Mormons were going to Sonora, but upon this full reliance could not be placed. The belief is that the place of refuge other Commissioner, Governor Powell, were going at once to Salt Lake, but not with the army. Their powers are to either Governor Commissioners are to either Governor army. going at once to Sait lake, but not with the army. Their powers are to either Gov. Cumming or Gen. Johnston.

The government is in possession of dispatches from Minister Forsyth, who, at latest accounts,

was in correspondence with the Mexican govern-ment on subjects growing out of the Tax on property of American citizens. The point for demanding his passports had not yet been reached.

The whole number of land warrants issued in June was 963, to satisfy which will require 142,

000 acres.

New York Jane 29 (Tribute Washington)

Sr. Louis, June 29. A dispatch from Leaven-worth of the 27th inst. by the steamer Platte Valley to Booneville, says that the two compa-nies of the Second Infantry, coming to garrison Fort Leavenworth, together with two companies of the same command now at Fort Scott, are or-dered back to Fort Randall. They will be accompanied by 260 recruits, who will arrive here within ten days, from the Eastern States. This movement is understood to have reference to the recent hostile attitude of the Indians in Nebraska. The officers commanding this detachment are Captains Lord, Lyons and Gardiner, and Lieut. Smith.

THE UTAH ARMY.

Sr. Louis, July 2. A dispatch from St. Joeph, dated the 28th ult., by the U.S. express o Boonville, says the Salt Lake mail arrived there to-day, bringing dates from Salt Lake City to the 12th inst. Gen. Johnston was to start for the city on the 18th, with 3000 men in columns. The Army will enter the Valley via Soda Springs

on Bear river.
Col. Hoffman had arrived at Camp Scott with

There was quite a diversity of opinion at Camp Scott as to to what course the Mormons would pursue in regard to allowing the troops to enter

the Valley.

The mail party passed about 300 Mormons with give no information as to where they were going, or what they intended doing. Fifty mormons, who had escaped from the Valley, were met at Platte-bridge, wending their way to the States. Twelve companies of cavalry or dragoons were met near Fort Laramie, and they had passed Gen. Harney and Col. May encamped on Pawnee fork of the Little Blue.

A large number of troops were encamped on the Big Blue. Col. Morrison and his commune at the Little Blue.

The mail party also met supply trains between the fourth and fifth crossings of the Sweetwater. Col. Sanders was at South Pass, and was on the eve of starting on the exploration of the road from that place to Fort Hall.

The report that the Mormons had removed their families to Provo is confirmed. It is not known whether Brigham Young accompanied the Mormans or remained in the city. The Mormons have not gone either to Son Russian possessions, as anticipated by the authorities at Washington, but would do so next spring, if any but Mormons are placed there to

The Monroe Obseques. The coffin containing the remains of ex-President Monroe was exhumed on Friday morning, in a very private manner, and taken to the Church of Annunciation, where it remained until 4 P. M., when a funeral procession was formed and accompanied the remains to the City Hall. The procession was an imposing pageant, being headed by the 71st regiment. The coffin remained in the Governor's room until Saturday forenoon, where it was visited by thousands of pagels. Terms of the coffin remained in the Governor's room until Saturday forenoon, where it was visited by thousands of people. At 11 o'clock the 7th regiment arrived at the City Hall, when the coffin was delivered into their care in a brief speech by Mayor Tiemann. The procession then formed and marched to the steamer Jamestown, where the remains were formally delivered into the care and keeping of the Virginia committee by the Hon. John Cochrane in an eloquent speech. O. Jenning Wise responded on the part of the Virginians. The remains, with the committee, started for Virginia at 3 o'clock, while the 7th regiment took passage on o'clock, while the 7th regiment took passage on the steamer Ericsson. Upon the arrival of the steamers at City Point, the military escort and the civic guests will be conveyed to Richmond in a steamer chartered for the occasion.

THE FRENCH NAVY. The fleet in 1857 consisted of 10 ships of the line of 120 guns, 10 of 100 guns, 15 of 90 guns, 5 of 80 guns, 17 frigates of 60 guns, 17 of 50 guns, and 16 of 40 guns; 8 corvettes of 30 guns, and 12 of 24 guns; 30 brigs of 20 guns, 10 corvettes of 16 guns, 20 brigs of 16 guns, 10 brigantines of 4 guns, 40 schooners of 6 to 10 guns, 40 vessels of 4 guns, 40 steamers of 250 horse power and under, 20 corvettes of 800 tuns, 30 transports of 380 tuns, 3 steam frigates of 540 horse power, and one of 320; 6 corvettes of 250 horse power, and 33 steamers of 100 horse power and less; making in all 353 vessels of all kinds, carrying about 10,000 guns. The annual budget of the Navy Department for ten years, from 1846 to 1856, has ranged from \$20,000,000 to \$40,000,000. That for 1857 was \$26,500,000. guns, 15 of 90 guns, 5 of 80 guns, 17 frigates of

That for 1857 was \$20,000,000 to \$40,000,000.

Indian Depredations in Dacotal Chicago, June 28. Reports from Dacotal Territory state that the Yankton Indians, 3000 in number, are committing depredations on the white settlements along the Minnesota River. The cause is dissatisfaction at their annuities, now due, not being paid by the Government. They therefore intend to recover their lands, and drive the whites away. They have destroyed the village of Mary, and burned the town of Flancrau. An emigrant train has also been plundered. The settlers were concentrating at Minnesota Falls, preparatory to defensive operations.

More Verdancy. An elderly man—and a green one—named Wm. Delano, was waiting on Wadnesday last at the Fitchburg danct in Ros.

More Verdancy. An elderly man—and a green one—named Wm. Delano, was waiting on Wednesday last at the Fitchburg depot, in Boston, to take the train for Windsor,—when he was ton, to take the train for Windsor,—when he was accosted by a remarkably agreeable young man, who soon ingratiated himself into the old man's good will. About that time another beauty appeared on the ground with a bill of goods of \$40—when the young man found he had only a hundred dollar bill, which the other could not hear of course. Then Mr. Delegae is his change, of course. Then Mr. Delano, in his kindness changed it for them, and they soon disappeared. The bill was worthless. So, instead of taking the first train for Windsor, Mr. Delano took the most direct route to the office of the Chief of Police, and made known his loss, at the same time remarking that he rather mistrusted that the two fellows were up to some trick, added, "what a fool I was, for I've read of such things in the papers more than fifty times, and if I ever get hold of them I'll take a hundred dollars out

Crows in the Cornfield, or what "Poll" Got for telling a Lie. Mr. Parker Tilton, who resides at the lower part of the city, has had a very intelligent but roguish parrot residing in his family for the past fifteen years. The bird has always been allowed the privilege of the yard and frequently would stray into the adjoining fields. The parrot had been taught to keep a watch upon the crows that visited the cornfield of Mr Tilton to pick up his corn, which information he had frequently imparted. On Thursday last, "Poll" took her usual stroll, and this Taurston, aged 89 yrs.

Steamer Burned. Chicago, July 3. On the morning of the 1st inst. the steamer Galena took fire at the landing at Red Wing, Minnesota. The married before the Revolution. fire at the landing at Red Wing, Minnesota. The fire at the landing at Red Wing, Minnesota. The flames spread with such rapidity that the boat was soon enveloped in them. About 75 persons were on board, 68 of whom were saved. 75 persons were on board, 68 of whom were saved. The following are known to be lost—John Tyson, Holly Porter, Nancy Porter, Charles Porter and Lydia Porter, of Michigan. The books and papers were all lost. The boat was valued at \$50,000. No insurance.

CHINA ACADEMY.

The boat was valued at \$50,000. No insurance.

OPENING OF AFRICA. While England is seeking to reach the head waters of the Niger by steaming up that stream, the people of Liberia are about to send an exploring party overland interiorward, into the valley of that mighty river. This region of the continent is the great native caravan route. Two of these were recently seen, one of which could not have contained less than five thousand persons and one thousand beasts of burden. The Government of Algeria is striving to establish a direct and constant intergourse with Central Africa. The French calculate that under advantageous circumstances, the trade with that region would be worth sixty millions of farance annually, or ten millions of dollars, the bulk of which would consist of actual barter.

CHINA ACADEMY.

THE FALL TERM of this Institution will commence on MON-basterities when his Institution will commence on MON-bastruction will be given to those pursuing studies preparatory to entering College.

The French Langarge will also receive 'particular attention; dut no pains will be spared for the benefit of those studying the Higher English branches.

In connection with the School there will be a course of LECTURES to the Students and people delivered during the term, by which the following able gentlemen have been engaged.

The Celebrated Engle Mowing Machine,
WillCH was awarded the \$1000 Prize by the Mass. State
Society, after a three days' Trial with the Manny, Allen,
Kethum, and Hovey Machines in 1856.

I have a machine on hand for examination by persons desiring
to purchase, and at as early a date as grass is in condition to
cut, a public trial of the machine will be had at my place. Due
notice will be given of the time of trial. Those designing to
purchase Mowers this season are invited to examine this Machine before purchasing. It is believed to be an easier working
and more thoroughly made Mower than any other ever offered
to the public. Any number of Machines will be furnished at
short notice by
N. FOSTER, Local Agent.
Onrdiner, June 16, 1858. Cardiner, June 16, 1858.

Winship's Patent Winship's Patent
Upright Self-Ventilating Refrigerators.
It is now conceded by physicians that provisions are rendered very nuwholesome by being confined in a Refrigerator is which the air is not constantly and effectually changed, and the health of many families has suffered in consequence. The musty and sour smell common to most ice cheets is a sure indication of this poisonous and offensive tendency.
This Refrigerator is the only one ever offered that is perfectly ventilated, and in so scientific yet simple a manner that Paor. Sillings has introduced a description of it in his new work on Natural Philosophy as the best illustration ever practically tested of perfect ventilation.
The temperature is always uniform.
The temperature is always uniform.
There is no waste of ice.
There is no waste of ice.
The warm air cannot enter upon opening the doors.
Access to the ice is had without disturbing the provision chamber.

ISAAC VARNEY, Agent,
Water-et., Augusta, Me. PURE GROUND BONE.

D. T. MILLS & Ce.,

No. 64 BROAD STREET, . . . BOSTON,

OFFER for sale to the farmers of Maine, a pare article o
GROUND BONE, of their own manufacture, at \$2,50 per
barrel, securely packed, and delivered free of expense, at either
Depot or Wharf in Boston. Orders by mail or express, addressed
to us as above, will be promptly attended to.

One fact to which we would call the attention of Farmers is,
that nearly all of the Ground Bone manufactured and sold for
pure is adulterated with 33½ per cent. plaster. We warrant all
of ours free from plaster, and perfectly pure, and put our name
on each Box.

Morgan Witherell,

B MERROW HORRE.

This well known horse will stand, the present season, on Mondays and Tusadays at Dexter Village, and the remainder of each week at the subscriber's Stable in Hartland. Terms will correspond with the times. Good pasturage furnished for marcs sent from a distance, at reasonable rates. The Bangor Union of the 18th ult., thus speaks of this Horse.

"One of the finest Horses in Maine is the 'Merrow Horse,' se called. It was sired by the well known Witherell Horse, out of a full blooded Morgan mare. For beauty, strength, and speed, we think he cannot be surpassed. In this city, last fall, he made his mile in 2.42½, and was not in good trotting condition. At the State Fair, two of his colts took premiums—and another, four years of M, has been purchased for the Philadelphia market."

The subscriber invites all interested in horse raising to examine this horse and his stock;—and challenges any entire horse in the State to a fair trial of speed.

HARFORD MERROW.

Hartland, June, 1865.

WILL be sold at Public Auction, on account of Mortgagees and Assignees, on THURSDAY, July 5th, at 9 o'clock A. M., the entire Stock of Goods, in Biore occupied by JOHN MEANS & SON, Market Square, Augusta, consisting in part

And still the fishers out-bound, or scudding from th With grave and reverent faces the ancient tale recall, When they see the white waves breaking on the "Rock of Avery's Fall!"

From Chambers' Edinburgh Journal.

COUSIN ROBERT. O Cousin Robert, far away Among the lands of gold. How many years since we two met You would not like it told.

O Cousin Robert, buried deep Amid your bags of gold. I dreamt of you but yesternight Just as you were of old.

You own whole leagues-I, half a rood Behind my cottage door, You have your lacs of gold rupees And I my children four.

Your tall barks dot the dangerous seas, My "ship's come home"-to rest Safe anchored from the storms of life Upon one faithful breast.

And it would cause nor start, nor sigh, Nor thought of doubt or blame, If I should teach our little son Our Cousin Robert's name.

That name-however wide it rings. I oft think, when alone, I rather would have seen it graved

Upon a church-yard stone Where Cousin Alick lies; Ah, sometimes, woe to him that lives! And blessed he that dies!

O Cousin Robert, hot, hot tears, Drop, thinking of your face last night, Your hand's pathetic fold:

A young man's face-so like, so like Our mother's faces fair; A young man's hand, so firm to hold,

So resolute to dare. I thought you good-I wished you great; You were my hope, my pride; To know you good, to make you great,

I once had happy died; To tear the plague-spot from that heart, Place honor on that brow,

See old age come in crowned peace, I almost would die now; Would give-all that's now mine to give,

To have you setting there, The Cousin Robert of my youth-A beggar with gray hair.

O Robert, Robert, some that live Are dead, long ere grown old: Better the pure heart of our youth

Better the blind faith of our youth Than doubt, which all truth braves: Better to mourn-God's children dear,

Than laugh—the devil's slaves. O Robert, Robert, life is sweet, And love is countless gain;

Yet if I think of you, my heart

4. On those who err and are deceived

The Story Tellen.

SMILES FOR HOME.

BY T. S. ARTHUR. "Take that home with you, dear," said Mrs Lewis, her manner half smiling, half serious. "Take what home, Caddy?" And Mr. Lewis

Now, Mrs. Lewis had spoken from ment's impulse, and already partly regretted her remark.

"Take what home?" repeated her husband. 'I don't understand you."

turned towards his wife, curiously.

"That smiling face you turned upon Mr. Edward, when you answered his question just now." Mr. Lewis slightly averted his head, and walked on in silence. They had called in at the store of Mr. Edwards to purchase a few articles, and were now on their way home. There was no unile on the face of Mr. Lewis now, but a very grave expression instead-grave almost to sternness. The words of his wife had taken him altogether by surprise; and, though spoken

The truth was, Mr. Lewis, like a greats many other men who have their own business cares and troubles, was in the habit of bringing home a sober, and, too often, a clouded face. It was in vain that his wife and children looked into that face for sunshine, or listened to his words for tones of cheerfulness.

"Take that home with you, dear." Mrs. Lewis was already repenting this suggestion, made on the moment's impulse. Her husband was sensitive to a fault. He could not bear even an implied censure from his wife. And so she had learned to be very guarded in this particular.

"Take that home with you, dear! Ah, me! I wish the words had not been said. There will be darker clouds now, and gracious knows, they were dark enough before! Why can't Mr. Lewis leave his cares and business behind him, and let to smile: but I see he can smile if he tries. Ah! Why don't he try at home?"

So Mrs. Lewis talked to herself, as she moved passed, and street after street crossed, and still there was silence between them.

"Of course," said Mrs. Lewis, speaking in her own thoughts. "Of course he is offended. known, beforehand, that talking out in this way would only make things worse. Oh, dear ! I'm getting out of all heart!"

Mrs. Lewis almost started at the sound of her husband's voice, breaking, unexpectedly, upon her ear, in a softened tone. "What then?" he repeated, turning towards

"What then, Caddy ?"

her, and looking down into her shyly upturned

"It would send warmth and radiance through a-tremble with feeling "You think so?"

"I know so! Only try it dear, for this one of laying the cable. He says :evening.

away; and again they walked on in silence.

words as if talking to a spoiled child."

examination, Mr. Lewis said-"You thought the smile given to Mr. Edwards came easily enough?"

Mrs. Lewis.

an easy thing. So we smile and are gay in company, at cost of little effort, because all are smilare alone, I need not say. You, Caddy, are out equally well to the bottom, and messages sent dull not to see the intention of Sister Egerie in guilty of the sober face at home as well as your through 1500 miles. husband." Mr. Lewis spoke with a tender re-

proof in his voice. "But the sober face is caught from yours of-

"Are you certain of that, Caddy?" "Very certain. You make the sunlight and

the shadow of your home. Smile upon us; give On board the Niagara the cable was wound up us cheerful words; enter into our feelings and to within a short distance of the splice; where interests, and there will be no brighter home in it had been broken a second time, it is supposed all the land. A shadow on your countenance is by dragging on the bottom while being wound a veil for my heart; and the same is true as respects our children. Our pulses strike too near- 5100 lbs., as shown by the dynamometer-and ly in union not to be disturbed when yours has when it came in, over the wheels, was so kinked lost its even beat."

Again Mr. Lewis walked on in silence, his face unfit for further use. In one place it was twisted partly averted; and again his wife began to fear into half a dozen hard knots all together. that she had spoken too freely. But he soon dispelled this impression, for he said-

"I am glad, Caddy, that you have spoken thus plainly. I only wish that you had done so be- cable being the 'condemned,' like that in the first fore. I see how it is. My smiles have been for experiment; the hawser between the vessels was the outside world—the world that neither loved cast off, and both steamed away in opposite dinor regarded me—and my clouded brow for the rections. Agamemnon soon made signal, 'cable dear ones at home, for whom thought and care parted.' Niagara kept on and paid out 3 1-4 are ever-living activities."

even far in advance of the slow evolutions of minutes' time merely by the undulation of the trade; and his daily history was a history of sea. My deductions from these experiments are disappointments, in some measure dependent up- as follows : on his restless anticipations. He was not as willing to work and to wait as he should be; and, like many of his class, neglected the pearle ting on the least possible retardation, the ships that lay here and there along his life-paths, because they were inferior in value to those he and there along his life-paths, because they were inferior in value to those he and the case of the case hoped to find just a little way in advance. The deep water will be time, cable and buoy lost. consequence was, that, when the day's business This has been much insisted on-this buoying excitement was over, his mind fell into a brood- but it is now the general opinion that under no ing state, and lingered over its disappointment, circumstances would the cable fail to twist off in or looked forward with failing hope in the future a few hours. -for hope, in many things, had been long deferred. And so he rarely had smiles for his home. "Take that home with you, dear," whispered

was in danger of relapsing into his usual state. The warning was just in time. "Thank you for the words!" said be "I will

ot forget them." And he did not; but at once rallied himself and to the glad surprise of Jenny, Will, and Mary, met them with a new face, covered with fatherly smiles, and with pleasant questions, in pleasant tones, of their day's employments. The feelings of children move in quick transitions. They had not expected a greeting like this; but the response was instant. Little Jenny climbed into her father's arms. Will came and stood by his chair, answering in lively tones his questions while Mary, older by a few years than the rest leaned against her father's shoulder, and laid her white hand softly upon his head, smoothing back the dark hair, just showing a little frost,

from his broad, manly temples. A pleasant group was this for the eyes of Mrs Lewis, as she came forth from her chamber to the sitting-room, where she had gone to lay off her bonnet and shawl and change her dress Well did her husband understand the meaning look she gave him; and warmly did her heart

espond to the smile he threw back upon her. · Words fitly spoken are like apples of gold in pictures of silver," said Mr. Lewis, speaking to her as she came in.

"What do you mean by that?" asked Mary looking curiously into her father's face. "Mother understands," replied Mr. Lewis. miling tenderly upon his wife.

"Something pleasant must have happened, said Mary.

"Something pleasant? Why do you say that? ked Mr. Lewis. "You and mother look so happy," replied the

"And we have cause to be happy," answe the father, as he drew his arm tightly around her, "in having three such good children." Mary laid her cheek to his, and whispered "If you are smiling and happy, dear father

Mr. Lewis kissed her; but did not reply. H us see the old, pleasant, smiling face again. I felt a rebuke in her words. But the rebuke did thought this morning that he had forgotten how not throw a chill over his feelings; it only gave a new strength to his purpose.

home will be like Heaven.

"Don't distribute all your smiles. Keep few of the warmest and brightest for home," said along by the side of her husband, who had not Mrs. Lewis, as she parted with her husband on spoken a word since her reply to his query, the next morning. He kissed her, but did not 'Take what home?" Block after block was promise. The smiles were kept, however, and evening saw them; though not for the outside world. Other, and many evenings saw the same cheerful smiles, and the same happy home. And was not Mr. Lewis a better and happier man? He wont bear a word from me. I might have Of course he was. And so would all men be, if they would take home with them the smiling aspect they so often exhibit, as they meet their fellow-men in business intercourse, or exchange words in passing compliments. Take your smiles and cheerful words home with you, husband, father, and brothers. Your hearts are cold and dark without them

THE OCEAN TELEGRAPH CABLE.

A correspondent of the New York Journal of Commerce, writing from on board the steam the whole house," said Mrs. Lewis, her tones all frigute Niagara, at Plymouth, Eng., June 3, gives an interesting account of the experimental trip of the telegraphic fleet to test the practicability

"The fleet proceeded to the Bay of Biscay, lat "It isn't so easy a thing to put on a smiling 47° 12, N., long, 90° 32, W., when signal was face, Caddy, when thought is oppressed with made by this ship to the Gorgon to sound. Immediately her boat was seen in the water engag-"It didn't seem to require much effort just ed in complying with our request, and in about now," said Mrs. Lewis, glancing up at her hus- two hours the depth was reported at 2530 fathoms, band with something of archness in her look. say about two miles and three quarters. This Again a shadow dropped down upon the face being deeper than any water on the route bespot was at once selected for the experiments. Ac-"He is so sensitive!" Mrs. Lewis said to her- cordingly, the sterns of the two paying out ships self, the shadow on her husband's face darkening were connected by hawsers at the distance of over her own. "I have to be as careful of my about 600 feet from each other, and the end of the wire cable was sent by a hauling line from No, it did not require much effort on the part Niagara to Agamemnon, where it was spliced to of Mr. Lewis to smile, as he passed a few words, the end of hers, and both ships commenced paylightly, with Mr. Edwards. The remark of his ing out. Although the wire used was a piece of wife had not really displeased him; it had only condemned cable put on board to be expended, set him to thinking. After remaining gravely and was very defective in many parts, yet it silent, because he was undergoing a brief self- reached the bottom in perfect safety, and was wound up afterwards nearly to the surface of the water; but the hawser connecting the vessels having meanwhile parted, of course the wire was "It did not seem to require an effort," repli d broken when stretched "taut" between the ships -both machines winding up at the same time "No, not much effort was required," said Mr. This was regarded as highly encouraging. The Lewis. His tones were slightly depressed. "But experiment was made at night, under disadvanthis must be taken into the account; my mind tages, and with the old cable too. The machinery was in a certain state of excitement, or activity, performed its part, both in paying out and windthat repressed sober feelings, and made smiling ing up, admirably. Telegraphing was constant

The second experiment was with a portion o ing and gay, and we feel the common sphere of the good wire, the Atlantic Telegraph cable excitement. How different it often is when we proper. This was spliced in the same way, payed

This wire hung at the stern of the ship, sus taining its own weight in nearly three miles of water for an hour, electric communication being tener than you imagine, my husband," replied kept up in the meantime through the 1500 miles when the Agamemnon made signal 'wire parted. It broke near her stern, from the long continued tension and chafe from the motion of the ship. and curled, twisted and unlaid, as to be entirely

> The third and last experiment which deserve mention, was the trial of the buoy.

The splice was made as before described, miles, then attached the large buoy and small Mr. and Mrs. Lewis were now at their own watch buoy, dropping them overboard, steaming door, where they paused a moment, and then away from the buoys and paying out. She had went in. Instantly, on passing his threshold, not gone more than 3000 yards when the wire Mr. Lewis felt the pressure upon him of his usu- parted on the wheels, from its own defects. Nial state. The hue of his feelings began to change. ugara then returned to pick up buoy, but before The cheerful, interested exterior put on for those she reached it 'it toppled over,' showing the cahe met in busines intercourse, began rapidly to ble to be detached. On examination it was change, and a soher hue to succeed. Like most found the wire had cut through a 34 inch rope business men, his desire for profitable results was by which it was attached to the buoy, in forty

3d. That any attempt to buoy the cable in

4th. That any long stoppage of the ship by aceident to ships, engines, or by repairs of de fective cable, will be fatal." .

Mrs. Lewis, as they moved along the passage, and before they had joined the family. She had an instinctive consciousness that her husband ered "breeches of trust." Should trousers procured on credit be consid

AGRICULTURAL AND FAMILY

"Is she dead, then ?" "Yes, madam," replied a little gentleman brown coat and short breeches. "And her will ?"

A FRENCH WILL STORY.

"Is going to be opened here immediately by her solicitor.

"Shall we inherit anything?" "It must be supposed so; we have claims."

"Who is that miserably-dressed personage who intrudes herself here?" "Oh, she," said the little man, sneering, "she won't have much in the will; she is sister to the

"What ! that Anne who wedded in 1812 a may of nothing-an officer."

"Precisely so." "She must have no small amount of impudence to present herself here, before a respectable family."

had never forgiven her that mesalliance." Anne moved at this time across the room which the family of the deceased were assembled She was pale; her fine eyes were filled with tears, and her face was furrowed by care with precocious wrinkles.

""What do you come here for?" said, with great haughtiness, Madame de Villeboys, the lady who, a moment before, had been interrogating the little man who inherited with her.

"Madame," the poor lady replied, with humility, "I do not come here to claim a part of what does not belong to me; I come solely to see M. Dubois, my poor sister's solicitor, to inquire if she spoke of me at her last hour."

"What! do you think people busy themselve about you?" arrogantly observed Madame de Villeboys; "the disgrace of a great house-you, who wedded a man of nothing, a soldier of Bonaparte's !"

"Madam, my husband, although a child o the people, was a brave soldier, and, what is better, an honest man," observed Anne.

At this moment a venerable personage, th notary Dubois, made his appearance. "Cease," he said, "to reproach Anne with union which her sister has forgiven her. Anne loved a generous, brave, and good man, who had no other crime to reproach himself with than his poverty and the obscurity of his name. Nevertheless, had he lived, if his family had known him as I knew him, I, his old friend, Anne would be at this time happy and respected."

"But why is this woman here?" "Because it is her place to be here," said the notary, gravely; "I myself requested her to at-

M. Dubois then proceeded to open the will: "I, being sound in mind and heart, Egerie de Damfreming, retired as a boarder in the convent of the Sisters of the Sacred Heart of Jesus, dictate the following wishes as the expression of my formal desire and principal clause of my testa

"After my decease there will be found two hundred thousand francs in money at my notary's, besides jewelry, clothes, and furniture, as also a

chateau worth two hundred thousand francs. "In the convent where I have been residing there will only be found my book, 'Heures de la Vierge,' holy volume, which remains as it was when I took it with me at the time of the emigration. I desire that these three objects be divided into three lots.

"The first lot, the two hundred thousand france "The second lot, the chateau, furniture and

"The third lot, my book, 'Heures de la Vierge." "I have pardoned my sister Anne the grief hich she has caused to us, and I would comforted her in her sorrows if I had known sooner of her return to France. I compromise her in my will.

"Madame de Villeboys, my much beloved cousin shall have the first choice. "M. Vatry, my brother-in-law, shall have the cond choice.

"Anne will take the remaining lot." "Ah! ah! said Vatry, "Sister Egerie was a good one; that is rather clever on her part!" "Anne will only have the Prayer-book!" ex claimed Madame de Villeboys, laughing aloud. The notary interrupted her jocularly. "Madame," he said, "which lot do you

hoose ?" "The two hundred thousand francs in money. "Have you quite made up your mind?"

"Perfectly so." The man of law, addressing himself then to the good feeling of the lady, said, "Madame, you are rich, and Anne has nothing. Could you not leave her this lot and take the book of prayers, which the eccentricity of the deceased has

placed on a par with the other lots." You must be joking, M. Dubois!" exclaimed Madame de Villeboys; "you must really be very all this. Our honored cousin foresaw full well that her book of prayers would fall to the lot of

Anne, who had the last choice. "And what do you conclude from that?" in quired the notary.

"I conclude that she meant to intimate to he sister that repentance and prayer were the only achieved such marvellous changes in the opinions help she had to expect in this world. As she finished these words, Madame de Villeboys made a definite selection of the ready money and divorce—exalted the condition of woman

ewels, as his lot. "Monsieur Vatry," said M. Dubois to that olent institutions, open and expansive, to spring gentleman, "even suppose it had been the intenention of the deceased to punish her sister, it sort of a book is this, that even the winds and would be noble on your part, millionaire as you waves of human passion obey it? What other

to Anne, who wants it so much." "Thanks for your kind advice, dear sir," replied Vatry; "the mansion is situated on the very confines of my woods, and suits me admirably, all the more so that it is ready furnished. As to the jewels of Sister Egerie, they are remiiscences which one ought never to part with." "Since it is so," said the notary, "my poor

Madam Anne, here is the Prayer-book that re-Anne, attended by her son, a handsome boy ith blue eyes, took her sister's old Prayer book.

nd making her son kiss it after her, she said: "Hector, kiss this book which belonged to our poor aunt, who is dead, but who would of the power to be of God? ave loved you well had she known you. When you have learned to read you will pray to Heaen to make you wise and good as your father was, and happier than your unfortunate mother." to discern, as a soul to live freely and unimpeded, with tears, notwithstanding their efforts to pre-

serve an appearance of indifference. The child embraced the old book with boyish fervor, and opening it afterward-"O! mamma," he said, "what pretty pictures!" "Indeed!" said the mother, happy in the

ladness of her boy. "Yes. The good Virgin, in a red dress, holdng the infant Jesus in her arms. But why, mam- in one way, they must in another, or perish. ma, has silk paper been put upon the pictures !" "So that they might not be injured, my dear." "But, mamma, why are there ten silk papers

o each engraving?" The mother looked, and uttering a sudden shrick, she fell into the arms of M. Dubois, the furtherest into heaven is the beating of a loving notary, who, addressing those present, said: heart.

"Leave her alone, it won't be much; people don't die of these shocks. As for you, little one. addressing Hector, "give me that prayer book you will tear the engravings."

The inheritors withdrew, making various co jectures as to the cause of Anne's sudden illness, and the interest which the notary took in her. A month afterward they met Anne and her son exceedingly well yet not extravagantly dressed taking an airing in a two-horse chariot. This led them to make inquiries, and they ascertained that Madame Anne had recently purchased a hotel for one hundred and eighty thousand france, and that she was giving a first-rate education to her son. The news came like a thunderbolt upon them. Madame de Villeboys and M. de Vatry hastened to call upon the notary to ask for explanations. The good Dubois was working at

"Perhaps we are disturbing you?" said the rrogant old lady.

"The more so as Sister Egerie, of noble birth "No matter. I was in the act of settling purchase in the state funds for Madame Anne "What!" exclaimed Vatry; "after purcha sing house and equipages, she has still money to invest.

> "Undoubtedly so." "But where did the money come from !" "What! did you not see?" "When?" "When she shricked upon seeing what th

> rayer book contained which she inherited." We observed nothing." "Oh! I thought that you saw it," said th areastic notary. "That prayer book contained sixty engravings, and each engraving was covered by ten notes of a thousand francs each."

"Good Heavens!" exclaimed Vatry, thunder "If I had only known it !" shouted Mada de Villeboys.

"You had the choice," added the notary, "and

I myself urged you to take the prayer book, but you refused.' "But who could have expected to find a for tune in a breviary!'

The two baffled old egotists withdrew, the hearts swollen with passionate envy. Madame Anne is still in Paris. If you pa by the Rue Lafitte on a fine summer evening, you will see a charming picture on the first floor, illuminated by the pale reflections of wax lights. a lady who has joined the two hands of her son, a fair child of six years of age, in prayer before an old book of "Heures de la Vierge," and for

which a case in gold has been made. "Pray for me, child," said the mother. "And for who else," inquired the child. "For your father, your dear father, who per ished without knowing you, without being able

to love you. "Must I pray to the saint, my patron? "Yes, my little friend; but do not forget saint who watches us from heaven, and who smiles upon us from above the clouds."

The mother, then watering the fair child' head with her tears, answered : "Her name is-Sister Egerie.

"What is the name of that saint, ma

Sabbath Reading. THE TWO VILLAGES.

Over the river on the hill. Lieth a village white and still: All around it the forest trees Shiver and whisper in the breeze; Over it sailing shadows go Of soaring hawk and screaming crow, And mountain grasses low and sweet Grow in the middle of every street.

Over the river under the hill,

Another village lieth still; There I see in the cloudy night Twinkling stars of household light, Fires that gleam from the smithy's door. Mists that curl on the river shore; And in the roads no grasses grow For the wheels that hasten to and fro In that village on the hill, Never is sound of smithy or mill;

The houses are thatched with grass and flowers Never a clock to tell the hours: The marble doors are always shut. You cannot enter in hall or hut: All the villagers lie asleep; Never again to sow or reap; Never in dreams to moan or sigh, Silent, and idle, and low they lie

In that village under the hill, When the night is starry and still, Many a weary soul in prayer Looks to the other village there, And weeping and sighing, longs to go Up to that home from this below: Longs to sleep by the forest wild. Whither have vanished wife and child

And heareth, praying, this answer fall-"Patience! that village shall hold ye all." THE BIBLE.

How comes it that this little volume, compos by humble men, in a rude age, when art and science were but in their childhood, has exerted more influence on the human mind and on the social system than all other books put together? Whence comes it that this holy book has of mankind - has banished idol worship - has abolished infanticide-has put down polygamy for her share. Monsieur Vatry, as may be easily raised the standard of public morality—created imagined, selected the chateau, furniture and for families that blessed thing, a Christian home, and caused its other triumphs by causing benev are, to give up at least a portion of your share engine of social improvement has operated so long, and yet lost none of its virtue? Since it appeared, many boasted plans of amelioration have been tried, and failed-many codes of jurisprudence have arisen, and run their course. Empire after empire has been launched upon the tide of time, and gone down, leaving no trace upon the waters. But this book is going about doing good, leavening society with its holy principles-cheering the sorrowful with its consolation-strengthening the tempted, encouraging the penitent-calming the troubled spirit-and smoothing the pillow of death. Can such a book be the offspring of human genius? Does not the vastness of its effects demonstrate the excellency

What woman needs, is not as a woman to act or rule, but as a nature to grow, as an intellect The eyes of those who were present were filled to unfold such powers as were given her when we left our common home. If fewer talents were given her, yet if allowed free and full employment of these, so that she may render back to the giver his own usury, she will not complain; nay, I dare to say, she will bless and rejoice in her earthly birth-place, her earthly lot.

> HUMAN BEINGS are not so constituted that they can live without expansion. If they not get it THE candlestick set in a low place has given

light as faithfully, where it was needed, as that upon the hill. Or all earthly music, that which reaches the

Linseed Oil. 6000 GALLONS Linseed Oil, at store West end Kenne Feb. 8, 1858.

Important to Butter Makers. AVING known the real necessity of having pure ROCK SALT, in order to make good Butter, I would take this opertunity of informing the manufacturers of Butter in the State of Maine that I am prepared to furnish an article which is just what it purports to be, "Pure Rock Sail," particularly adapted for Dairy use. The Sall is thoroughly cleaneed and dried before grinding. It is put up in 20 lb. bags, with a picture of a Cow on each bag. I would recommend that farmers be particular in calling for my Salt, in order that they may be perfectly sure of a pure article. Office Nos. 5 & 7, Long Whaf, Portland,

Waterville, March, 1858. The Morgan Horse Young Hector. The Morgan Horse Young Hector.

Our farmers who feel desirous of improving their Stock of Horses by the infusion of new Biood have now a good opportunity of doing so by employing the "YOUNG HECTOR," recently introduced into this neighborhood by Gro. M. Robinson's Farm, about a mile East of the Bridge. He was raised in Penobscot County, and is seven years old. He was exhibited at the State Fair at Bangor last year, where he was much admired by good judges. He is a compact, muscular, well-proportioned Horse—healthy, active and strong, and a free, clear, and easy traveller, and can do his mile in 2.40. His color is black, and his colts are generally of black or bay. Mr. R. has two of his colts, which may be seen and examined at his stable. The docility as well as symmetry, and good constitution of this breed of Horses, are so well known that further need not be said on that score. The following gentlemen very cheerfully allow themselves to be referred to for further particulars in regard to the character of this Horse, and the goof properties of his stock:—

Tutton Simpson, Winslow; John L. Seavey, Waterville; John K. Russell, škowhegan; Benj. Hodges, Samuel Johnson, Hallowell; F. L. McGowan, Gardiner; Hiram Reed, G. W. Ricker, Maj. W. H. Chisam, Augusta, Augusta, May 24, 1858.

Black Hawk Stallion.

THIS Horse is now 4 yrs. old, weighs 978 lbs.; of a dapple black color; and is a superior and handsome styled horse—having all the qualities that can be desired in a horse. In beauty, style, action and speed, he is unsurpassed. His sire was a celebrated trotting Black Hawk horse. His dam was one the best breeding English mares in the State of Massachusetts. Black Hawk was bred by I. Richardon, Eq., of South Haverhill, Mass. The subscriber having purchased the above Horse at an expense of \$1000, world invite those wishing to improve their breed of horses to call and examine Black Hawk for themselves,—and he holds himself in readiness to prove his pedigr. at any time. Black Hawk will stand as follows:—Mondays, at Temple Mills; Thursdays, at East Dixfield; Saiturdays, at Farmington Hill; and the remainder of the week at the stable of the subscriber.

ALMON H. BROWN.

Wilton, May 18, 1858.

BLACK LION.

THIS young Stallion is 4 years old, June 20th, this season, is 15 hands high, and weighs 1000 lbs.; he is of a jet black color.

PEDIOREE: BLACK LION was sired by Black Lion, and he by the original Vermont Black Hawk, owned by David Hill, Esq., of Bridgport, Vt., and he by Sherman Morgan. The dam of BLACK LION was sired by Morgan Tiger, and he by Sherman Morgan.

This Horse will be kept for the improvement of the breed of horses at the stable of the subscriber, at Winthrop Village, Kennebec Co., Mc. All interested in raising fine blooded horses are requested to call and examine this horse.

Winthrop Village, May 1858.

Winthrop Village, May 1858. Farm for Sale.

[Truated in Monmouth, about two miles from the Depot, containing about 70 seres of excellent land suitagood wood los, and two good orchards, partly engrated. The farm cuts about fourteen tons of hay. The buildings are a story-and-a-half House and porch, in good repair; a wood-shed, and Barn of sufficient size for the place, with a never failing well of soft water. The farm is mostly fenced with good stone wall; and is in a good neighborhood, and pleasantly situated. There are about eight tons of hay, one cow, a sleigh and wagon, and the farming tools, which will be sold with the farm is desired. The whole will be sold at a bargain, as the subscriber is about moring away. Price \$1400. Terms, \$1000 down, the rest in one year. Possession given immediately.

Monmouth, March 2, 1858. Farm for Sale.

Statement and pedigree is correct.
